EDUCATION

Brawijaya University, Malang

Aug 2022 - Jun 2026

Bachelor of Computer Science, Informatics Engineering

GPA 4.00 of 4.00

- Instructed 150+ students as a laboratory teaching assistant across four courses: Basic Programming, Object-Oriented Programming, Operating Systems, and Computer Networks.
- Actively participated in software development competitions, winning 3+ awards at the national level.

WORKING EXPERIENCES

Zenius Education, Jakarta

Nov 2025 - Present

Fullstack Developer

- Developed a survey feature end-to-end using Clojure (backend) and Next.js (frontend), providing product and business teams with actionable user insights.
- Built Skul.id, a school-focused LMS leveraging Zenius content, enabling teachers to manage and deliver learning materials.
- Optimized service performance by refactoring code using Valkey and MongoDB features, reducing response time by 40% on the Skul.id platform.

FIFGROUP, Jakarta

Feb - Jun 2025

Backend Developer

- Engineered Spring Boot RESTful APIs aligned with business requirements using Domain-Driven Design architecture for auditing collateral.
- Optimized Oracle Database queries, achieving a 25% performance boost across services.
- Established comprehensive testing practices with 80%+ unit test coverage and integration tests using JUnit, Mockito, and TestContainers.
- Designed and implemented an event-driven architecture using Apache Kafka, enabling asynchronous processing and significantly enhancing system efficiency.

Dakana Techworks, Malang

Jul 2024 - Feb 2025

Backend Developer

- Built an automated Excel reporting system, reducing manual reporting effort by 90%.
- Designed and implemented CI/CD pipelines with GitHub Actions integrating SAST, cutting deployment time by 90%.
- Deployed containerized applications using Docker with blue-green deployment strategy, achieving 99.99% availability.

TEDxUniversitasBrawijaya, Malang

Sept 2024 - Feb 2025

Lead Backend Developer

- Deployed production system on K3s, achieving 99.99% availability.
- Designed and developed 10+ API endpoints for event registration and merchandise transactions, serving ~3,000 users.
- Built an automated PDF invitation generation system, reducing manual creation time by 80%.

PROJECTS

BCCLI

Oct - Nov 2025

Open-source CLI tool that scaffolds Go projects with Domain-Driven Design structure.

- Built an interactive TUI for project initialization, improving developer experience and onboarding speed.

Foreglyc
Diabetes monitoring and prevention app built for Google Solution Challenge Competition.

Mar - May 2025

- Implemented Google OAuth 2.0 for secure user authentication and authorization.
- Designed an N8N automation workflow integrating Google Sheets and Gemini LLM for personalized meal recommendations.

Water Potability Monitoring System
Freelancer job portal platform connecting clients with independent professionals for ITCONVERT Competition.

Jun - Sep 2024

- Engineered a real-time water quality monitoring system using gRPC for service-to-service communication and InfluxDB for time-series data storage.
- Built a Grafana dashboard for real-time monitoring and visualization of water quality metrics.
- Showcased to the Ministry of Communication and Digital Affairs of Indonesia (2025).

ORGANIZATIONS

Basic Computing Community, Malang
Vice General Lead

Dec 2024 - Dec 2025

- Developed strategic plans and projections to guide BCC’s direction for the upcoming term while monitoring departmental KPIs and achieving a 90% fulfillment rate across organizational targets.
- Actively contributed as a backend member by delivering a technical workshop on RabbitMQ, covering message broker concepts and real-world distributed system implementations.
- Established and maintained strategic partnerships with external organizations, securing 5+ collaborations to support the growth and initiatives of BCC.

Google Developer Group on Campus, Malang
Lead Cloud Curriculum

Sep 2024 - Oct 2025

- Designed and created 5+ in-depth learning modules spanning containerization, virtualization, Linux, and IaC
- Delivered technical workshops on virtualization and containerization for 50+ students, driving hands-on understanding

Informatic Centric Network Laboratory, Malang
Coordinator Research and Development

Oct 2024 - Oct 2025

- Organized a community outreach program for 50+ students of SMK Telkom Malang, delivering sessions on cloud computing, security, and IoT.
- Researched and developed intelligent autoscaling mechanisms in Kubernetes using Reinforcement Learning enhanced with Fuzzy Logic

ACHIEVEMENTS

MAGE X, Surabaya
1st App Development MAGE X at Sepuluh Nopember Institute of Technology.

Nov 2024

ITConvert, Jember
1st Software Development ITConvert at Jember University.

Sep 2024

Hackfest, Surabaya
1st Hackathon Social Games and Start Up Hackfest at Ciputra University

Apr 2024

LANGUAGES AND SKILLS

- Bahasa Indonesia (Native), English (Professional Working Proficiency).
- Programming Language (Go, Java, PHP, Java Script, Python, C#, Clojure), Framework (Gin, Fiber, Echo, Laravel, Springboot,.NET, Pedestal, Next, React), Database (MySQL, SQL Server, PostgreSQL, MariaDB, Redis, InfluxDB, MongoDB, Elasticsearch), API (REST, GraphQL, gRPC, Websocket), DevOps (Docker, Kubernetes, Jenkins, Github Actions), Messaging (RabbitMQ, Kafka).
